

The Attributes of OXYSERUMS

Professional Serum For Hydrafacial™ Treatment

Cleansing & Hydration

OXY Cleanse will work on deep cleansing by loosening dirt and skin debris with a gentle acid that leaves no irritation. Bacteria derived by the oil and dirt are also removed, leaving you with a healthy glowing skin. Hydrates the skin and decongestion of pores.

Exfoliation

OXY Salicylic will effectively exfoliates away that dry, dead layer of skin at the surface, instantly taking your skin from dull to glowing. Our Salicylic works best for acne (blackheads and whiteheads). It can also help prevent future break-outs. Our Serums is the easiest way to reduce dark spots and repair your skin.

Anti-Aging

OXY Peptide (Anti-Aging) serums promotes a brighter, more even complexion, nixing fine lines and keeping skin looking fresh. Our Peptide Serums improves skin's texture, strength and resilience. Human skin will age regardless of what they do, but our serum slows down the process.

Antioxidants

OXY Antiox serum benefits the skin by protecting it from environmental damage and stress. Our serums reduce the chance of oxidative damage of the skin. They prevent the damage caused due to UV rays and pollution that leads to premature aging.
